### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 20 February 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/20/07 has been entered.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Ikeda et al., EP 1244163 A1.

Rejection of claims 1-11 and 16 drawn to a negative electrode and 14-15 drawn to rechargeable lithium battery; claims 12-13 drawn to a method of making negative electrode.

Ikeda et al., teach a negative electrode for a rechargeable lithium battery (abstract) on a metal foil current collector (0029), particles of active material containing silicon (0032-0036); the negative current collector has projections and recesses on its

Art Unit: 1745

surface, the projection shaped to have a recurved side face portion that curves more outwardly as it extends closer to distal end of projection (0022; Fig. 3-10). It teaches projection is shaped to include a narrow portion, which defines the recurved side face portion (Fig. 10, 13, 14). It teaches collector has a surface roughness of 0.01-1  $\mu\text{m}$  (claim 9). It teaches surface roughening by electroplating process (0043). It teaches a method by providing metal foil current collector having recesses and projections, providing anode mix including silicon on collector (0056-0058). It teaches a rechargeable lithium battery comprising negative electrode, positive electrode and nonaqueous electrolyte (0062-0065). It teaches a binder mixed to the silicon powder (0058). It teaches an electrically conductive powder made from copper (0031).

Thus, the claims are anticipated.

### ***Response to Arguments***

3. Applicant's arguments with respect to above claims have been considered but are moot in view of the new ground(s) of rejection.
